Target version:	2.5		
origin:			

Description

The general suggestions is as follows: FSComponentRepositoryHelper computes a hash of the component properties and if the has changed, the repo cache will be purged.
In order to not purge overly agressively, the specific component repository can suggest some ignorable properties, such as the priority.

History

#1 - 12.03.2017 14:47 - Henning Blohm

- Tracker changed from Bug to Improvement

- Subject changed from SVN repo should be purged when URL changed to Repo cache should be purged when significant properties such as URL changed

- Description updated

- Status changed from New to In Progress

#2 - 23.04.2017 23:14 - Henning Blohm

- Status changed from In Progress to To Be Documented

tested manually.

#3 - 23.04.2017 23:18 - Henning Blohm

- Status changed from To Be Documented to Resolved
