z2-Environment - Bug #1019

Synchronization throws exceptions without home layout

29.03.2013 15:07 - Henning Blohm

Status:	Closed	**Start date:**	29.03.2013
Priority:	High	**Due date:**

origin:			

Description
Currently, Z2 synchronization relies on propagation of invalidations and target state re-attaining via message sending to worker processes. Several places assume that a running Z2 environment has an active home layout. In an embedding scenario this may not be valid. Hence no code should make a strong assumption on an active home layout.
