Target version:	3.0			
origin:				

Description

The actual problem is the namespace change in z2v3 to org.z2env.

This means:

- the generated templates are wrong,
- z.properties files are not recognized

Suggestion: Add a configuration for the namespace or retrieve the actual templates from the server (which is uncool, as at least one sync must have happened).

More benefits:

- could easily support new web.xml templates (e.g. for servlet 3.x)

History

#1 - 11.02.2015 17:33 - Henning Blohm

- Description updated

#4 - 19.03.2015 15:57 - Udo Offermann

- Subject changed from Eclipsoid Templates adaptable or fetched from Server? to Eclipsoid Templates not compatible with org.z2env

- % Done changed from 0 to 50

#5 - 31.03.2015 09:33 - Udo Offermann

- Status changed from New to Resolved
