z2-Environment - Bug #1886

GitCR deletes clone in some circumstances

20.02.2015 14:10 - Henning Blohm

Status:	New		**Start date:**	20.02.2015
Priority:	Normal		**Due date:**

Target version:	3.0			
origin:				

Description

Problems establishing a connection may lead to deletion of the whole repo.

This should never be done as it leaves the system in worse shape in many cases (after all - the clone might have been up-to-date)
