

## z2-Environment - Improvement #1895

### Introduce boot.config/reposUp system state

12.04.2015 17:04 - Henning Blohm

<b>Status:</b>	Resolved	<b>Start date:</b>	12.04.2015
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Henning Blohm	<b>% Done:</b>	100%

<b>Target version:</b>	3.0		
<b>origin:</b>			

#### Description

All repositories should participate in this state so we register them early.

When depending on processUp, we might intermix some component start with a later repository registration. If the later repository provides an override of some dependency component that would have been found in the new version otherwise, we end up in a rather badly defined state.

If all repos register in a first go however, all overrides are effective before any application code is involved.
