

z2-Environment - Feature #1979

Port the relative file system repo from v3.0.

02.09.2017 23:26 - Henning Blohm

Status:	Resolved	Start date:	02.09.2017
Priority:	Normal	Due date:	
Assignee:	Henning Blohm	% Done:	0%
Category:	z2-core	Estimated time:	0.00 hour
Target version:	2.6		
origin:			
Description			
The relative file system repo allows a repo declaration that has its content relative to the declaration. This in turn allows a simple and more flexible folder structure to set up local deployments (as repos may be contained or co-located).			
This feature is used in particular in conjunction with the roots repo.
