

z2-Environment - Feature #1981

Remove HomeLayout approach and make worker processes simple dependency components

02.09.2017 23:31 - Henning Blohm

Status:	Resolved	Start date:	02.09.2017
Priority:	Normal	Due date:	
Assignee:	Henning Blohm	% Done:	0%
Category:	z2-base	Estimated time:	0.00 hour
Target version:	2.7		
origin:			
Description			
That is, there is no particular choice of home to arrange. Any worker process may be managed by simply creating a state dependency - as already implemented in 3.0.			
Worker processes may however only be prepared in the home process.			
Acceptance Criterias			
<ul style="list-style-type: none">• Worker Processes are simple dependency components, prepare() makes sure the worker is running• HomeLayout is removed and to be replaced by a system state• The home launcher now accepts a number of dependency components as root of the dependency chain via the property com.zfabrik.home.state• The home layout parameter is kept for compatibility reasons and simply adds to state
