<b>origin:</b>			
<b>Description</b>			
<p>In order to provide for simple application icon customization of the z2 gui, a system property is to be supplied that allows to specify an icon, either as classpath resource or file relative to Z2_HOME.</p> <p>In the case of a classpath resource, the property should adhere to "classpath:&lt;path&gt;", in the case of a file, the property should indicate "file:&lt;path&gt;".</p> <p>See also <a href="https://stackoverflow.com/questions/19927509/set-icon-for-executable-jar-file">https://stackoverflow.com/questions/19927509/set-icon-for-executable-jar-file</a></p>			

#### History

#1 - 10.06.2018 17:05 - Henning Blohm

- Status changed from New to Resolved

Application icons are added in launching/src/icons/app.

Can be exchanged when needed.

Not implementing custom config for icon.
