

z2-Environment - Improvement #2000

Exclude source jars from classpath

18.04.2018 22:56 - Henning Blohm

Status:	Resolved	Start date:	18.04.2018
Priority:	Normal	Due date:	
Assignee:	Henning Blohm	% Done:	100%
Category:	z2-core	Estimated time:	0.00 hour
Target version:	2.6		
origin:			
Description			
As the eclipsoid class path resolution automatically resolves source jars from the java resources, it is very convenient to include those with the java component.			
However, currently those are part of the class path resultion and will not be ignored.			
This is expensive and has led to misconfigurations (--> quartz) in the past when source jar resources where found in META-INF.			
Suggestion:			
Introduce a regex for exclusion with a default of <code>*-sources.jar</code> .

We have new Java Component Properties

- java.publicClassPathInclusion
- java.publicClassPathInclusion

both with default

```
^.*(?<!--sources)\\.jar$
```
