z2-Environment - Improvement #2008

Make MVN-CR repo names symbolic so they are robust under links

12.06.2018 21:38 - Henning Blohm

Target version:	2.6			
origin:				

Description

Currently mvncr fragments add to repos by component name. In the light of the component link introduced with 2.6 this is not a robust mechanism anymore as the repo component resolved is not necessarily the repo component that fragments add to.

Change to use a symbolic mvncr.repository name in the repo declaration and mvncr.repository participation in the fragment.
