

z2-Environment - Bug #2060

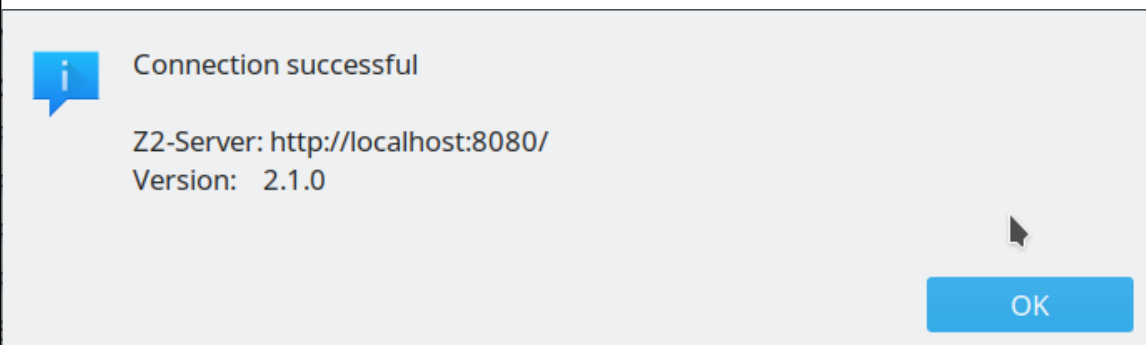

Eclipsoid shows no or wrong z2 version at connection test

15.03.2020 23:34 - Henning Blohm

Status:	New	Start date:	15.03.2020
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	z2-base-tools-eclipsoid	Estimated time:	0.00 hour
Target version:	2.11		
origin:			

Description

It says

Remaining reasons are that eclipsoid actually parses the version expecting a dot-separated sequence of numbers - which is not always true.

Acceptance Criteria

- The version parsing in `com.zfabrik.eclipsoid.plugin.preferences.EclipsoidPreferencePage` is dropped
- The backend supplied version is show as is.

Implementation Hint

- Use `curl -u "z*":z http://localhost:8080/eclipsoid/z2info` to test the backend.

History

#1 - 11.07.2021 16:28 - Henning Blohm

- Target version changed from 2.9 to 2.10

#2 - 08.06.2023 17:37 - Henning Blohm

- Subject changed from *Eclipsoid server-side does not respond with correct z2 version at connection test* to *Eclipsoid shows no or wrong z2 version at connection test*

- Description updated

- Category changed from *z2-base* to *z2-base-tools-eclipsoid*

- Assignee deleted (Henning Blohm)

- Target version changed from 2.10 to 2.11
