

## z2-Environment - Bug #2077

### com.zfabrik.db.data connections are not enlisted with JTA but workunit

13.08.2020 18:35 - Henning Blohm

<b>Status:</b>	New	<b>Start date:</b>	13.08.2020

<b>Description</b>			
<p>This leads to follow-up failures with Hibernate DDL isolation that sets connections to autocommit=true.</p> <p>In this case, Hibernate (correctly) assumes that it is at liberty to set any connection to autocommit=true because it did not find any transaction to resume.</p> <p>That however leads to an autocommit transaction in the workunit.</p> <p>Suggestion:</p> <ul style="list-style-type: none"><li>• Enlist connections with the Transaction rather than the workunit</li><li>• Refuse autocommit=true when in a transaction</li></ul>
