z2-Environment - Feature #2101

Z2-Info Pane as z2 webapp

13.09.2021 14:14 - Udo Offermann

Status:	New		**Start date:**	13.09.2021
Priority:	Normal		**Due date:**	
Assignee:	Henning Blohm		**% Done:**	0%
Category:	z2-base		**Estimated time:**	0.00 hour
Target version:	2.11			
origin:				

Description

Extend the z2-admin webapp by some useful development tools like

- dependency resolver - show the dependencies of z2 components as well as "my dependent components"
- component browser - shows all components and their types
- z2-repository browser - shows all repositories and their z2-modules

The idea is to replace the z2-plugin (Eclipsoid, z2-plugin for IntelliJ) info panes and embed these webapps into the IDE

History
