Acceptance Criteria

- Jetty version is updated

Design

- We separate some lower level jetty dependencies such as javax.mail to additional modules so that they may be overwritten by customization repos. See below.

Notes:

- The resolution includes Jetty 10 and the dependency versions:

libraries	z2 module	aliases
javax.activation	z2-base.base:com.zfabrik.javax.activation	javax.activation:javax.activation-api/java, javax.activation:activation/java
javax.mail	z2-base.base:com.zfabrik.javax.mail	org.glassfish:javax.mail
Apache commons	z2-base.base:com.zfabrik.apache.commo ns	commons-logging:commons-logging/java
