

z2-Environment - Improvement #2145

Support public include references to be included into source via includes

19.12.2022 09:51 - Henning Blohm

Status:	Resolved	Start date:	19.12.2022
Priority:	Normal	Due date:	
Assignee:	Henning Blohm	% Done:	100%
Category:	z2-core	Estimated time:	0.00 hour
Target version:	2.10		
origin:			

Description

Currently when including a java component (include) into another java component (includer), the include may have dependencies that need to be maintained in the includer to make sure the include is effective. With this improvement we enhance the include mechanism to have an includees public references added to the private or public references of the including component for public or private inclusion respectively.

Acceptance Criterias

- There is a new reference query parameter **resolve** that resolves to "public", "private", or "test" references of the qualified reference.
- This query and the **expand** query is documented

Use

Given this new reference query parameter, we can model the solutions like this:

```
java.publicIncludes=includee  
java.publicReferences=includee?resolve=public
```
