

z2-Environment - Improvement #2167

Port Z2Jupiter to use java serialization for transport to reduce dependencies

31.01.2024 09:03 - Henning Blohm

Status:	Feedback	Start date:	31.01.2024
Priority:	Normal	Due date:

Target version:	2.10.1		
origin:			

Description

The use of jackson in Z2Jupiter implies an implicit dependency on all users that may interfere with other Jackson versions in use. Unfortunately, a transport layer implementation is required by the API library as that is what clients use.

In order to remove that use of jackson, Z2Jupiter should use java serialization

Acceptance Criteria

- Z2Jupiter does not require the jackson library
- Optionally the use of jackson is removed from z2-base.base

History

#1 - 01.02.2024 15:27 - Henning Blohm

- Status changed from In Progress to Feedback

#2 - 18.04.2024 10:43 - Henning Blohm

- Target version changed from 2.11 to 2.10.1
