

z2-Environment - Bug #2172

Transaction prematurely removed from workunit

03.03.2024 17:34 - Henning Blohm

Status:	Resolved	Start date:	03.03.2024
Priority:	Urgent	Due date:	
Assignee:	Henning Blohm	% Done:	0%
Category:	z2-base	Estimated time:	0.00 hour
Target version:	2.10.1		
origin:			

Description

Currently the commit and rollback of a nested transaction removes the transaction object from the work unit.

It seems there is really no need to remove it but rather set the status to STATUS_NO_TRANSACTION.

Acceptance Criteria

- Nested transactions do not remove the transaction object
- Wish: Add TransactionUtil.required()/mandatory()/never() etc. mimicking the standard propagation styles.

History

#1 - 03.03.2024 17:43 - Henning Blohm

- Description updated

#2 - 22.04.2024 15:41 - Henning Blohm

- Target version changed from 2.11 to 2.10.1

#3 - 25.04.2024 16:05 - Henning Blohm

- Status changed from In Progress to Resolved

This is actually the expected behavior for the user transaction.
