Description			

History

#1 - 27.07.2012 16:14 - Henning Blohm

- Priority changed from High to Normal

#2 - 27.07.2012 16:15 - Henning Blohm

- Assignee deleted (Redmine Admin)

#3 - 07.09.2012 10:08 - Udo Offermann

- Status changed from New to In Progress

accumulated transport tool improvements

- API refactoring
- adding from with revisions header line to summary page
- Retry on ssl timeouts
- svnkit API updates
- Escaping JIRA commands in transport tool summary
- increasing progress logger max-lines to 10000
- com.zfabrik.dev.transport: when "Filter on User's projects" is set the transport contains only changes up to the latest user's revision (per project)

User X has changed projects A, B & C within a revision range from #1000 to #1800 in the source repo, while HEAD is at [#2000](#). User X has changed project A on revisions #1100, #1200 & #1300, project B on #1150, #1350 and [#1550](#) and project C on #1600 and #1800.

The Transport tool will create the delta workspace for project A considering changes up to revision #1300, for project B up to [#1550](#) and project c up to #1800, ignoring all later changes

- com.zfabrik.transport/tool: add "only user's project" filter, so that only projects are provided that were changed by the user in the given revision range

#4 - 07.09.2012 10:11 - Udo Offermann

- Category changed from z2-core to z2-base

#5 - 07.09.2012 10:12 - Udo Offermann

- Status changed from In Progress to Resolved
