

z2-Environment - Feature #875

Support "Binary Hub" repository

27.07.2012 11:15 - Henning Blohm

Status:	Closed	Start date:	27.07.2012
Priority:	Normal	Due date:	
Assignee:	Henning Blohm	% Done:	100%
Category:	z2-core	Estimated time:	40.00 hours
Target version:	2.2		
origin:			
Description Support a component repository implementation over z2 that consolidates a systems repositories behind one repository facade that only provides binaries. The purpose is to avoid source code downloads to application nodes. This should happen in a way that it will not be necessary to define alternative system configurations, neither for the hub vs, application nodes nor in development or qualification. Suggestion: The bin hub repo will hide all lower-prio repos from visibility to the extend that repository configs will be hidden from the components space The repository will be accessed over http / REST. Access protection can be established via BASIC auth. On the provider side, the system repo will have to be overwritten by the origin repo config.
