| Target version: | 2.1 | | |
| origin: | | | |
| Description | | | |
| Today all child folders of the devcr are scanned for LOCAL files indicating armed z2-modules; multiple base-folders can be defined. However this is unpractical if new Git repositories are added on the fly, which are not known in advance. | | | |
| For this purpose the devcr will be extended to consider not only child folders but also grandchild folders. | | | |

History

#1 - 21.08.2012 21:39 - Udo Offermann

- Status changed from New to Resolved
- % Done changed from 0 to 100

Consider 2nd level folders but only if 1st level folder contains no LOCAL file

#2 - 22.08.2012 10:07 - Henning Blohm

- Status changed from Resolved to Closed

reviewed ok

#3 - 22.08.2012 10:08 - Henning Blohm

- Target version set to 3

#4 - 24.08.2012 10:24 - Udo Offermann

- Target version changed from 3 to 2.1
