Description			
Regular component repositories, i.e. with the exception of the dev repo and maybe based on configuration settings should issue a warning when producing the same components.			
More specifically in the Component Repository Helper classes, when delegating find, retrieve, and the like down the repo change, when detecting overwritten matches from below, a warning should be printed.			
When overlaying is the intention, as with the dev repo, a configuration setting should indicate so.

Feature # 887: Dev Repo should issue a warning when finding duplicate modules			Rejected

Confused issues. This one still open. [#887](#) resolved

#4 - 08.09.2012 10:50 - Henning Blohm

Make that an info (see [#894](#))

#5 - 08.09.2012 23:36 - Henning Blohm

This is harder than thought. Repos do not even wonder if there is stuff down the chain, if they have it.

Could be added to AbstractComponentRepo after load DB
