

## z2-Environment - Bug #959

### z2-samples.cdh4-base has conflicting project identifier

11.12.2012 17:08 - Udo Offermann

<b>Status:</b>	Closed	<b>Start date:</b>	11.12.2012

<b>Target version:</b>			
<b>origin:</b>			

#### Description

env.sh contains:

```
export Z2_HOME=$NOSQL_HOME/../z2-base.core
```

but in svn://z2-environment.net/z2-environment/branches/v2.1/z2-base.core/.project  
the project is named 'core':

```
<projectDescription>
  <name>core</name>
  ...

```

So there will be a problem when you check out the project in Eclipse...

#### History

##### #1 - 11.12.2012 18:54 - Henning Blohm

- Status changed from New to In Progress

##### #2 - 11.12.2012 23:00 - Henning Blohm

- Project changed from 15 to z2-Environment

- Category changed from 10 to z2-samples

This problem is due to the fact that the Subclipse plugin of Eclipse uses the project name ("core") as check out folder while the command line client uses the folder name ("z2-base.core").

Changed the env.sh script so that it will test for both locations. Left a note in [http://redmine.z2-environment.net/projects/z2-environment/wiki/Install\\_prepacked\\_CDH4](http://redmine.z2-environment.net/projects/z2-environment/wiki/Install_prepacked_CDH4).

##### #3 - 11.12.2012 23:30 - Henning Blohm

- Status changed from In Progress to Resolved

- % Done changed from 0 to 100

Applied in changeset z2-base:z2-environment-subversion-mirror|r74.

##### #4 - 11.03.2013 22:31 - Henning Blohm

- Status changed from Resolved to Closed
